Education

University of Florida (UF) - Gainesville, FL

May 2027

Bachelor of Science in Computer Science; Geospatial Information Analysis Certificate; Digital Arts and Science Minor

- **Relevant Coursework:** Introduction to Software Engineering, Operating Systems, Data Structures and Algorithms, Digital Image Processing

Skills

Languages: HTML, CSS, JavaScript, Java, C++, Python

Frameworks & Tools: React, Node, MongoDB, Git, Three.js

Software: Figma, ArcMap, ArcGIS Pro, ArcGIS StoryMaps

Experience

Information Technology Assistant - University of Florida

April 2025 - Present

- Provide front-line technical support to students & faculty, enabling access to class websites and computer resources
- Cooperated effectively with a team of 20, working 20 hours per week during the summer
- Troubleshoot classroom technology issues, improving uptime and user satisfaction with academic tech resources

Web Developer - Machine Intelligence Lab (MIL)

August 2024 - Present

- Designed a new functional website for the MIL using Figma, then implemented using HTML and Tailwind CSS
- Taught web design to a team of 3 and coordinated with developers to integrate components into a fully functional website showcasing our autonomous maritime system
- Collaborated with 2 developers to create interactive 3D web components with Three.js

Undergraduate Research Assistant - Hurricane and Tornado Research Lab

August 2024 - May 2025

- Collaborated with 2 professors to research the relationship between housing demographics, architectural forms, and structural vulnerabilities to wind and storm surge damage
- Developed machine learning models for hurricane damage prediction and loss estimation, contributing to model validation and financial impact analysis
- Conducted data collection from public records and use MATLAB and Python to perform statistical analyses

Mass Communications Chair - Filipino Student Association

August 2023 - May 2025

- Co-lead 13+ interns to plan the logistics and programming of 2 GBMs and cultural events 100+ attendees each
- Facilitated web-dev subteam in using JS, HTML, CSS, and React.js to design, develop, and launch a new website
- Collaborated with fellow board members and web interns to integrate their web content to reflect FSA's values
- Hosted regular team bonding socials to strengthen team morale and cohesion

Projects

Centsible - React Native Web, Node.js, MongoDB

April 2025

- Spearheaded frontend development for a gamified budgeting web platform promoting student financial literacy
- Designed pixel-themed UI, automated expense tracking, budget visualization, and user progress feedback systems
- Applied MVC architecture, manual testing workflows, and agile risk mitigation strategies

CostCompass - GIS, Google Maps API, U.S. Census API, Open AI API

September 2024

- Created an interactive GIS platform integrating location and economic data for real-time cost-of-living insights
- Integrated APIs for seamless user experience and improved data visualization for relocation analysis
- Developed dynamic map visualizations and location-based filters to help users compare regional living expenses

Pantry Management - Next.js, React, Firebase, GCP, Vercel

July 2024

- Developed dynamic inventory tracker for managing household food items (quantity adjustment & search features)
- Deployed full-stack functionality via Firebase and GCP with an optimized UI using Vercel
